

For Part 3, the website was enhanced to improve interactivity and usability while keeping the original design intact. On the Home Page, images now zoom slightly when hovered over, and the training video was repositioned below the images. Additionally, Google Maps was embedded to show Tubake Secondary School, where the team trains and uses the school grounds. On the Contact Us page, a registration form was implemented with JavaScript validation, allowing users to submit their information and receive a confirmation message without reloading the page. We also considered adding club merchandise such as jerseys and scarves, but since the club is in a rural area, no products are available to sell at this time. Overall, the enhancements keep the original color scheme and layout, including the hamburger menu, while making the website more dynamic and user-friendly.
